Program Outline

DOER will reimburse up to 100% of the incremental cost of a new vehicle or qualified retrofits of existing vehicles procured by municipal and local public entities and meeting the criteria of this application (see limits shown in Appendix A of the Program Opportunity Notice and the funding detail sheet attached to this application). Applications must be accompanied by a letter signed by the legal representative of the applicant authorized to commit the applicant to purchasing the vehicles included in this application. Also, a price quote from an authorized dealer of vehicles/retrofits listed in this application must be included. A total of \$10,000,000 may be available for this program. There is no limitation on the amount of funds an applicant may receive. Selected applicants will be responsible for procuring the vehicles within six months of grant award, registering the vehicles in the Commonwealth of Massachusetts, providing insurance, inspections, and supplying performance data as described in the application document. Program length is three years from vehicle delivery date. All vehicle procurement transactions shall be between the vehicle supplier and program participant.

Payment of Grant Funds

Payment will be made upon DOER's receipt of a written contract between the vehicle supplier/equipment up-fitter and the Grantee. Grantee must submit an invoice from an authorized vehicle dealer/up-fitter on company letterhead, showing the total cost for each vehicle being requested. The invoice shall be accompanied by a document from the same

dealer/equipment up-fitter showing anticipated vehicle delivery/up-fit completion date. Grantee should receive payment in approximately 45 days from the date DOER receives the invoice.

SELECTION CRITERIA

The selection of eligible Grantees is based on meeting Mandatory Requirements. Mandatory criteria requires a “YES” answer in order to qualify for selection; a “NO” answer will automatically disqualify an applicant.

Instructions for Completing Application

1. Complete Chart A
2. Complete Chart B
3. Complete Chart C
4. Complete Chart D

Chart A

Mandatory Selection Criteria

A “NO” answer will automatically disqualify the applicant

CRITERION	YES	NO
The applicant will match the amount awarded per vehicle. (Note: The base vehicle cost may be used as a match).		
Applicant will share all program related cost and operational information with DOER as requested.		
Vehicle must be registered, garaged, and operated more than 50% in Massachusetts.		
Applicant must be in good standing with the DOT and any state and local authorities.		
Proposed retrofit meets CARB certifications.		
Applicant has secured source of local fueling for vehicles requested (complete Chart D).
